TIPS: HANDLE USE

- EVA** EVA grips absorb moisture and provide a smooth comfortable grip.
- Rubber** Full sense of grip, harder in winter, easy to crack, do not have sweat-absorbent function (Wicking Function), summer easy to slip;
- Cork** Full sense of grip, not affected by the season, the material has a sweat-absorbing function (Wicking Function), but easy to wear and tear
- Plastic** Poor grip, easy to crack in winter, easy slip in summer, but the cost is low, cheap and convenient.
