FISHING

SELCO FISHING

Weihai Selco Fishing Tackle Co., Ltd. was established in 2005. It is a company specializing in all kinds of fishing tackles such as rods, reels, hooks, floats, lures, lines and other accessories.

Selco has been at the forefront of Carp Fishing for over 12 years. More recently, we have introduced a full range of carp fishing accessories including feeder cages, hair rigs, feeder rigs, needles and bait stings. All Selco products are designed, made and tested with professional and precise attitudes and exported worldwide.

FEEDER CAGE

FEEDER CAGE

HOW TO ... LOAD A METHOD FEEDER CAGE

01

Load in a small amount of pellets and place your hookbait on top.

02

Fill the feeder to the mould with more pellets.

03

Put the feeder on top and press down into the mould.

04

Separate the feeder from the mould, you get a finished article.

IN-LINE FLAT METHOD FEEDER

The flat-bottomed design makes them ideal for all situations, including casting tight to the sloping banks of an island. The recess in the front of the feeder is with a 6# Rolling Swivel, which will provide just enough tension to make a semi-fixed rig. Alternatively they can be used with Quickchange Beads to make a complete free-running rig. This feeder with a half-transparent plastic frame will act better under water.

SOFT METHOD MOULD

Taking a tapered shape to your bait for increasing aerodynamics forces and to improve the casting distance.

FEEDER CAGE

NEW UPGRADE

IN-LINE FLAT METHOD FEEDER

Provide a special design that ensures all your bait get to the lakebed. The Flat-bottomed Method Feeder allow you to present a parcel of bait with your hookbait inside. The impact shield prevents bait coming off on impact with the water. To aid casting, the Method Feeder has a weighted nose and an aerodynamic design. The feeder is finished in a subtle color, it is extremely un conspicuous on the lakebed.

- Small Method Feeder compatible with Small Method Mould.
- Large Method Feeder compatible with Large Method Mould.

ELASTICATED FLAT METHOD FEEDER

Very similar to the In-line Flat Method Feeder on size and shape design. The elastic line shakes in water can attract more fish. The flat-bottomed design ensures they always land in the correct way, the bait on the top of the groundbait or moulded pellet ball. The light army green color blends in both groundbait and the bottom of feeder.

CODE	SIZE
SGXA-LK1012	107mm

RAPID LOOP TYER

**HOW TO ...
USE THE LOOP TYERS**

Thread your stopper or in-stopper onto your line.

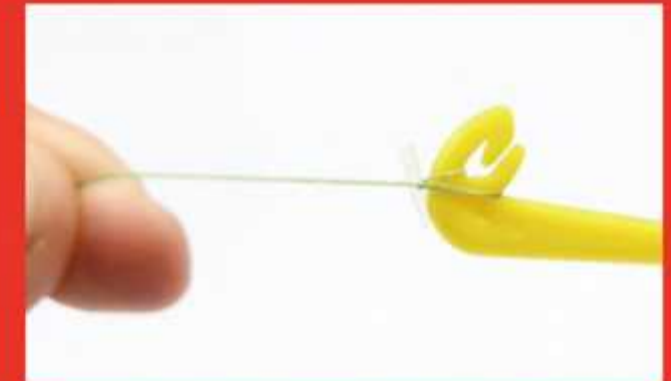

Form a loop and trap your finger like this.

Twist the loop tyer once or twice.

Wrap the loop on the other hook of loop tyer.

Tighten down the loop onto the neck of the loop tyer.

Take the knot off the neck of the loop tyer.

The finished loop should be like this.
